## PROYECTO VALLE DE NAGO

Date 25 May 1995

Substance Vesicular Basalt

Lot Number 14F/16  
Object metate

Cat No 14F/16/6

Multiples? (u, b, c, etc.)  
Nope

Cat by 73

Drawn by 73

## Rough Description:

Paste Group (lenses + figurines):

Thickness 3.1 cm

Handle width

Form (lenses):

Height 5.4

Handle thickness

Width 8.0 cm

Diameter

## Full

## Verbal Description

~~This one end of a very tiny metate, perhaps w~~  
~~a child's practice tool, or used for grinding something other than~~  
~~corn.~~ The grinding surface is an elongated rectangle, and  
 from its end to the break it is 9.5 cm. It is only slightly <sup>more</sup> smoothed  
~~and~~ on top than on the ~~sides~~ sides, and there is a 2.1 cm wide area  
 in the center, which runs 2.8 cm from the finished end all the way to the  
 break, which is the slightest bit lower, and not worn much at all. It has  
 two legs on the finished end, which are in cross section rounded  
 on their inner sides and have square corners on the outside. The  
 sides are very flat, and slant slightly inward towards the legs'  
 bases. The finished end is not as flat, and the opposite end is broken almost  
 straight across. The ~~bases~~ <sup>bottoms</sup> of the legs are also worn smooth. No reuse evident
